Methods

1. Get all patients

Retrieves the list of all registered patients to populate the dentist's table dynamically.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/api/patients

Response

Status	Response
200	[{"patientID": "...", "fullName": "...", "phone": "..."}]
400	{"error": "Unable to fetch patients."}

2. Render patient registration form

Renders the visual form to register a new patient.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/patients/new

Response

Status	Response
200	Returns HTML view (patient registration form)
500	{"error": "Unable to load form."}

3. Render patient edit form

Loads the edit form pre-filled with the patient's existing data.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/patients/1727095414/edit

Type	Params	Values
URL_PARAM	patientID	string

Response

Status	Response
200	Returns HTML view (pre-filled patient edit form)
400	{"error": "Patient ID required."}
404	{"error": "Patient not found."}
500	{"error": "Unable to load edit form."}

4. Get payment history

Retrieves the payment history and calculates current status (Pending, Partial, Completed).

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/api/payments

Response

Status	Response
200	[{"paymentID": "...", "amount": 50.0, "status": "Partial"}]
500	{"error": "Unable to fetch payment history."}

5. Get inventory list

Retrieves the inventory list, automatically calculating expiration status (Valid, Due, Expired).

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/api/supplies

Response

Status	Response
200	[{"supplyID": "...", "supplyName": "Resin", "status": "Current"}]

500	{"error": "Unable to fetch inventory."}
-----	---

6. Render payment form

Renders the visual form to record payments.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/payments/new

Response

Status	Response
200	Returns HTML view (payment form)
500	{"error": "Unable to load form."}

7. Render supply management form

Renders the visual form to manage inventory.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/supplies/new

Response

Status	Response
200	Returns HTML view (supply management form)
500	{"error": "Unable to load form."}

8. Render payment edit form

Loads the edit form pre-filled with an existing payment record.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/payments/:paymentId/edit

Type	Params	Values
URL_PARAM	id	string

Response

Status	Response
200	Returns HTML view (pre-filled Payment edit form)
400	{"error": "Payment ID required."}
404	{"error": "Payment not found."}
500	{"error": "Unable to load edit form."}

9. Render supply edit form

Loads the edit form pre-filled with an existing supply item.

Request

Method	URL
GET	https://hw16geturi-s.onrender.com/supplies/3/edit

Type	Params	Values
------	--------	--------

URL_PARAM	id	string
-----------	----	--------

Response

Status	Response
200	Returns HTML view (pre-filled supply edit form)
400	{"error": "Supply ID required."}
404	{"error": "Supply not found."}
500	{"error": "Unable to load edit form."}

Glossary

Conventions

- **Client** - Client application.
- **Status** - HTTP status code of response.
- All responses are in JSON format except where HTML views are returned.
- All request parameters are mandatory unless marked as [optional].
- All request parameters are mandatory unless explicitly marked as [optional]
- The API includes both RESTful endpoints (data operations) and HTML views (forms and dashboards).
- Authentication is required for most endpoints except the public treatments page and login page.

Status Codes

All status codes are standard HTTP status codes. The below ones are used in this API.

2XX - Success of some kind

4XX - Error occurred in client's part

5XX - Error occurred in server's part

Status Code	Description
200	OK
201	Created
400	Bad request
401	Authentication failure
403	Forbidden
404	Resource not found
500	Internal Server Error
