Real-World Web Applications

Asynchronous dataflow principles are already powering many of the web applications we interact with daily, enabling real-time, dynamic experiences.

Netflix & YouTube

Adaptive video streaming chunk-by-chunk over HTTP for seamless playback.

Uber & Delivery Apps

Continuous coordinate updates via WebSocket data streams for live tracking.

Figma & Collaborative Tools

Real-time, conflict-free state synchronization across multiple users.

Financial Dashboards

Low-latency trading and live ticker updates without page reloads.
