

Team 3, HTML-Team, César Galarza

Project: Ser Salud Physiotherapy Booking System

GitHub URL: <https://github.com/DiverCesar/AWD30716-HTML.git>

IP/domain for URIs: <http://20.55.45.48:4000>

07) LENIN ISAAC ERAZO CAMPOS.....	6/10	Inspection: 7/10
08) CÉSAR LUIS GALARZA VILLALVA.....	6/10	Inspection: 10/10
09) BRAYAN PATRICIO GUALOTUÑA AMAGUAYA...	6/10	Inspection: 7/10

Summary of grades

UCD : 8/10

CD : 7.3/10

Endpoints: 60/100 → 6/10

REST 18/20

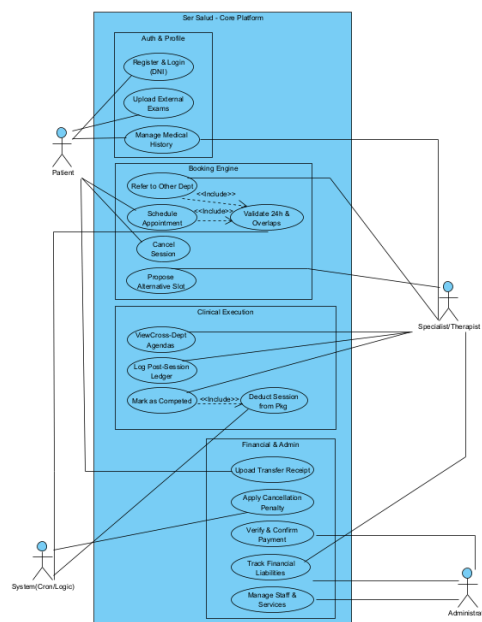

(ORM) 10/10

Clean Code 20/30

UCD : (input) 8/10

-1 (actor “System”)

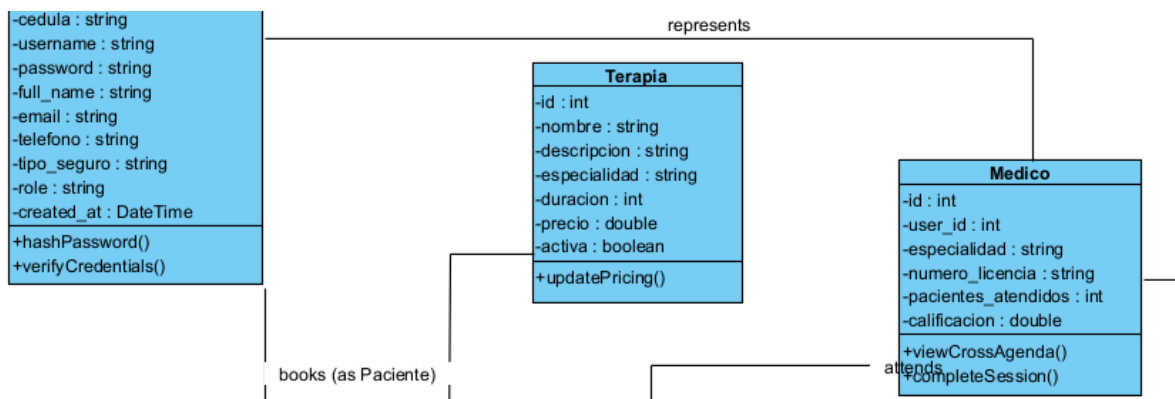

-1 Creating, editing, and deleting therapies are not shown in the diagram (URI Method: POST /api/therapies, PUT /api/therapies/:id, DELETE /api/therapies/:id)

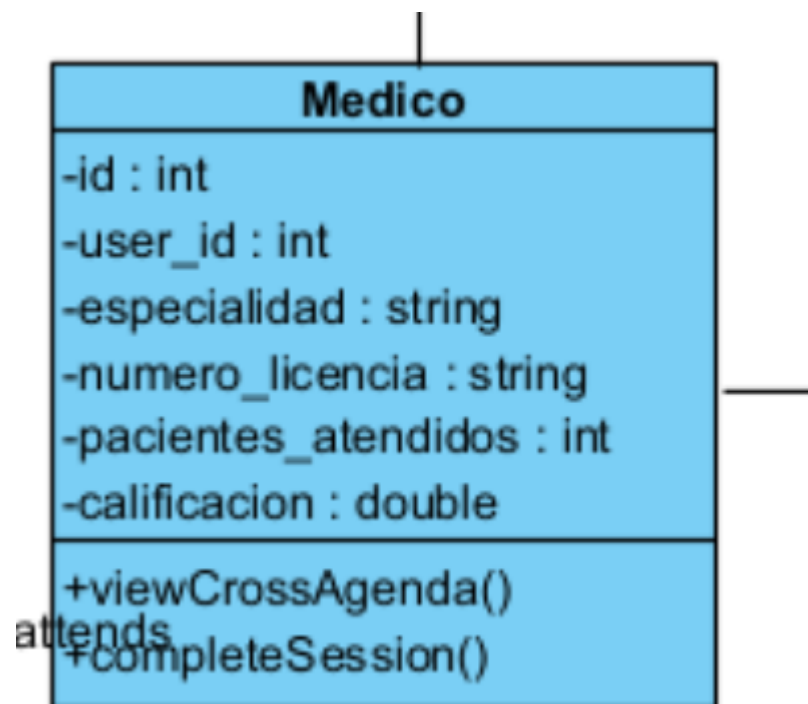

CD : (input) 7.3/10

-0.4(class names in spanish)

-1.8 (some attributes in spanish)

-0.1 There aren't the same medical attributes between the CD and the URI documentation

9.1 Medical Staff Module

View All Doctors

GET http://20.55.45.48:4000/api/medicos

Expected response:

```
[
  {
    "id": 9,
    "userId": 21,
    "fullName": "Dr. Carlos Mendoza Silva",
    "cedula": "1111111111",
    "email": "carlos.mendoza@flova.com",
    "telefono": "0991111111",
    "especialidad": "Fisioterapia",
    "numeroLicencia": "MED-FIS-001",
    "calificacion": 4.8,
    "pacientesAtendidos": 245,
    "horarioAtencion": [
      { "diaSemana": 1, "horaInicio": "08:00", "horaFin": "16:00" }
    ]
  }
]
```

-0.1 Rules forgotten in the text: The diagram includes key validations (such as `validateDoubleBook()`) that the Epic 5 document completely ignores.

-0.1 There aren't the same user attributes between the CD and the URI documentation

9.2 User Accounts Module

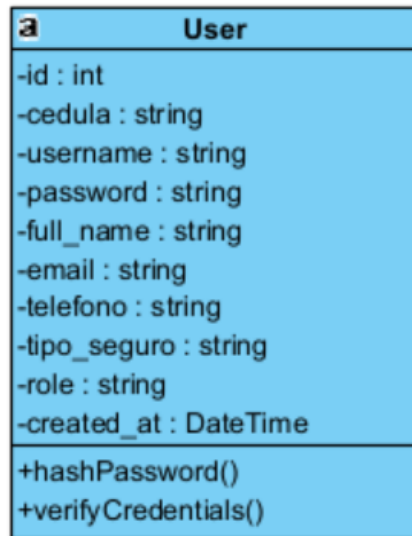

Get All Users (Admin)

GET http://20.55.45.48:4000/api/users

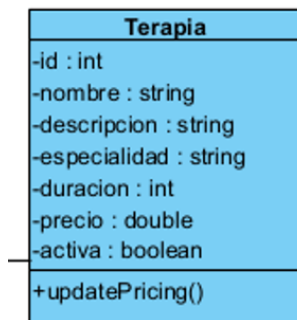

Authorization: Bearer {{token.admin}}

Expected response:

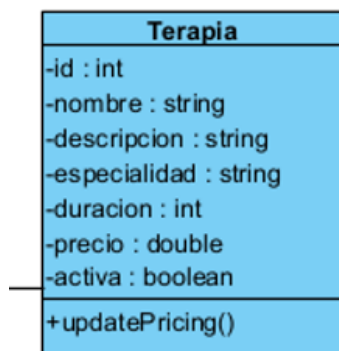

```
1  [
2    {
3      "id": 18,
4      "cedula": "1234567890",
5      "username": "1234567890",
6      "fullName": "Juan Perez Garcia",
7      "email": "juan.perez@email.com",
8      "role": "paciente"
9    }
10 ]
```

-0.1 Creating, editing, and deleting therapies are not shown in the diagram (URI Method: POST /api/therapies, PUT /api/therapies/:id, DELETE /api/therapies/:id) -0.1

-0.1 The class diagram does not contain: imagen: string, but it does exist as a response from the URI: POST http://20.55.45.48:4000/api/terapias -0.1

7 "imagen": "https://picsum.photos/seed/descon/400/300"

Endpoints (design) 9 end-points (Data access), 24 BL → 33 , each EP/2 → 60

-There is a query string in the URI design

7.2 View Therapies by Specialty

GET <http://20.55.45.48:4000/api/terapias?especialidad=Fisioterapia>

-There are URIs in spanish

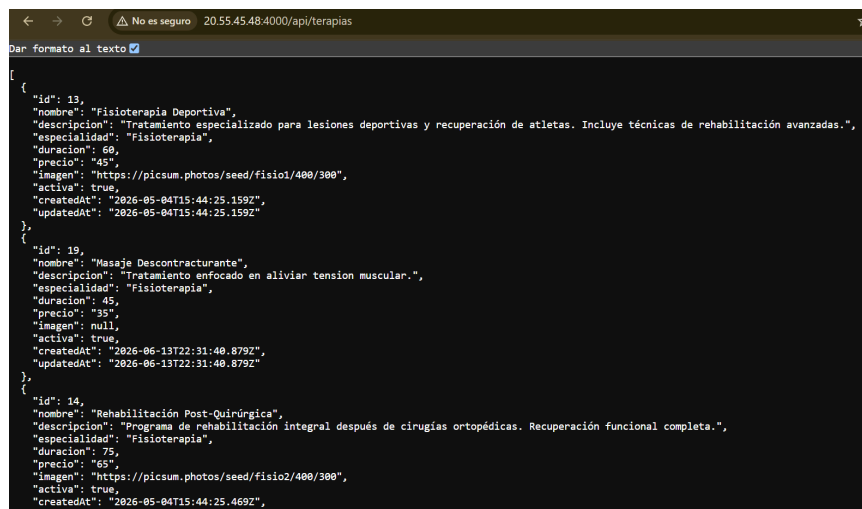

7.1 View All Therapies

GET <http://20.55.45.48:4000/api/terapias>

7 Therapies Module

URI 7.1 : View all therapies: This is working correctly

GET <http://20.55.45.48:4000/api/terapias>

REST 18/20

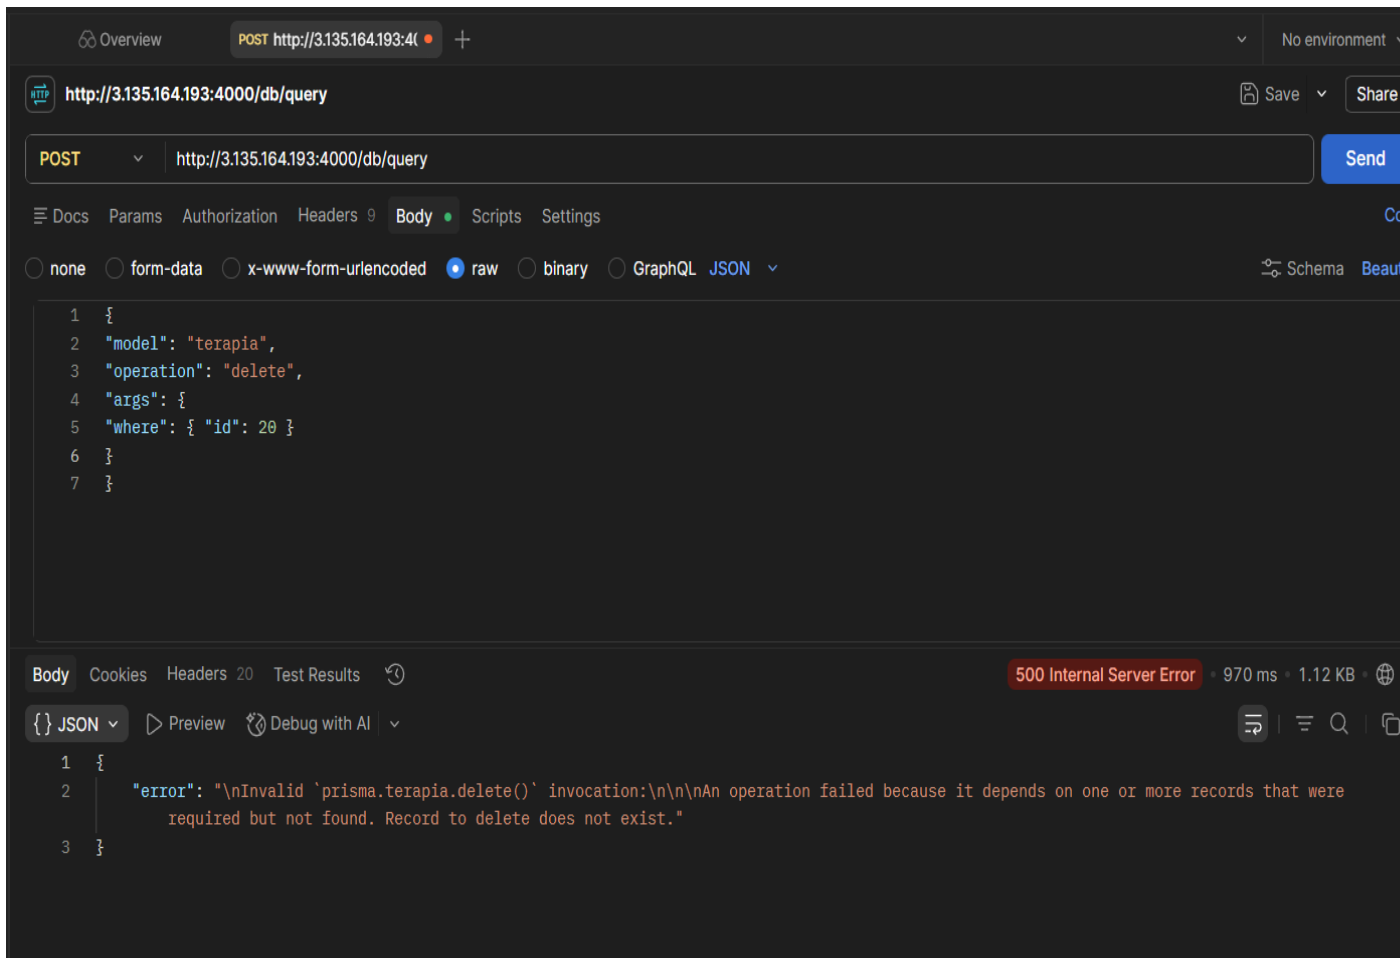

5.6 Delete Record (delete)

5.6 Delete Record (delete)

POST `http://3.135.164.193:4000/db/query`

1. Initialize a new evaluation request object and entitle it **DB Proxy - delete**.
2. Choose the structural operation mode type method as **POST** and target the server query router endpoint.
3. Verify the placement of the internal gateway key structural pair within the **Headers** layout panel.
4. Under the request **Body** options sheet, select **raw** → **JSON** parameters and define the destruction execution argument:

```
1 {  
2   "model": "terapia",  
3   "operation": "delete",  
4   "args": {  
5     "where": { "id": 20 }  
6   }  
7 }
```

7 Therapies Module

URI 7.2 View Therapies by Specialty: It works correctly, but as a query string

7.2 View Therapies by Specialty

GET <http://20.55.45.48:4000/api/terapias?especialidad=Fisioterapia>

9.1 Medical Staff Module

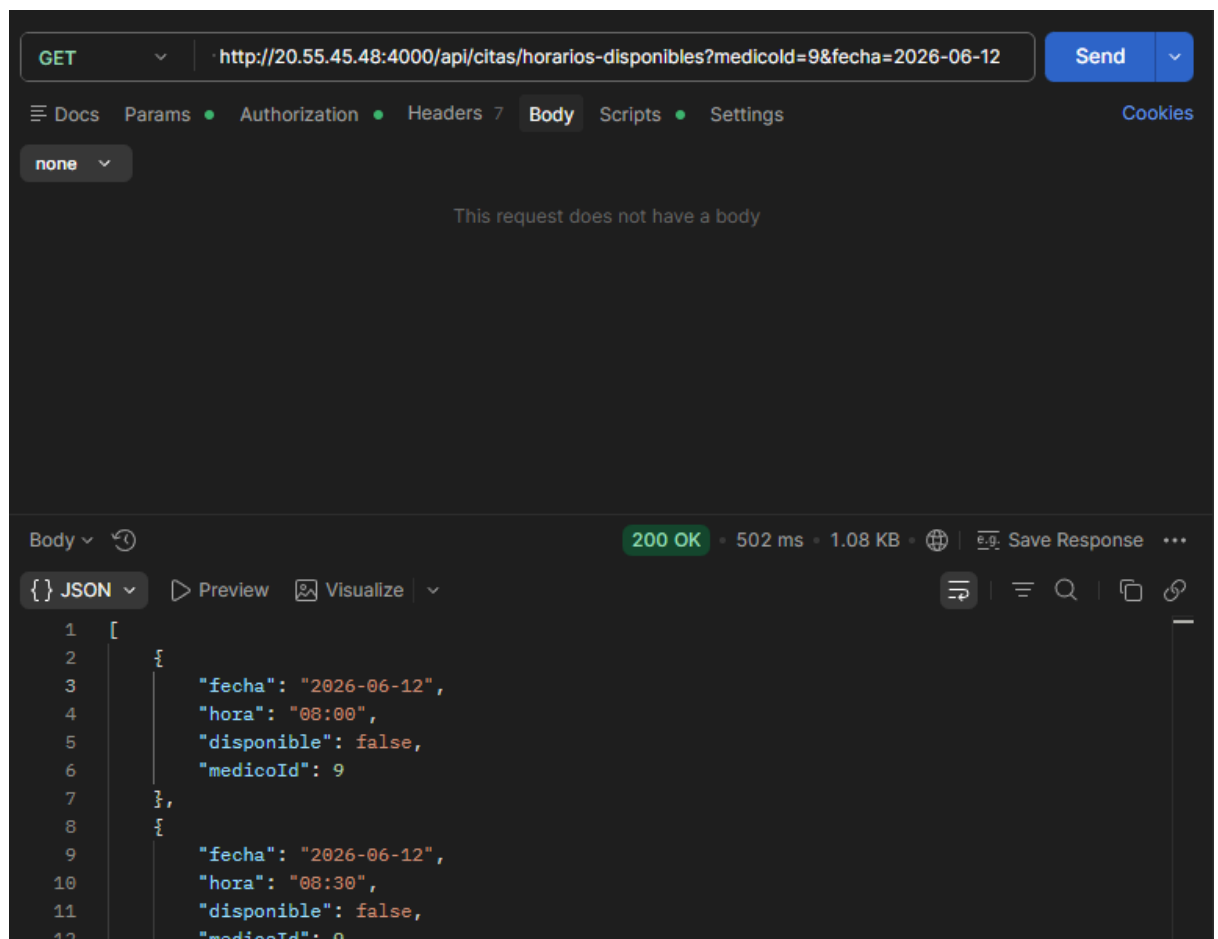

View All Doctors

GET <http://20.55.45.48:4000/api/medicos>

Expected response:

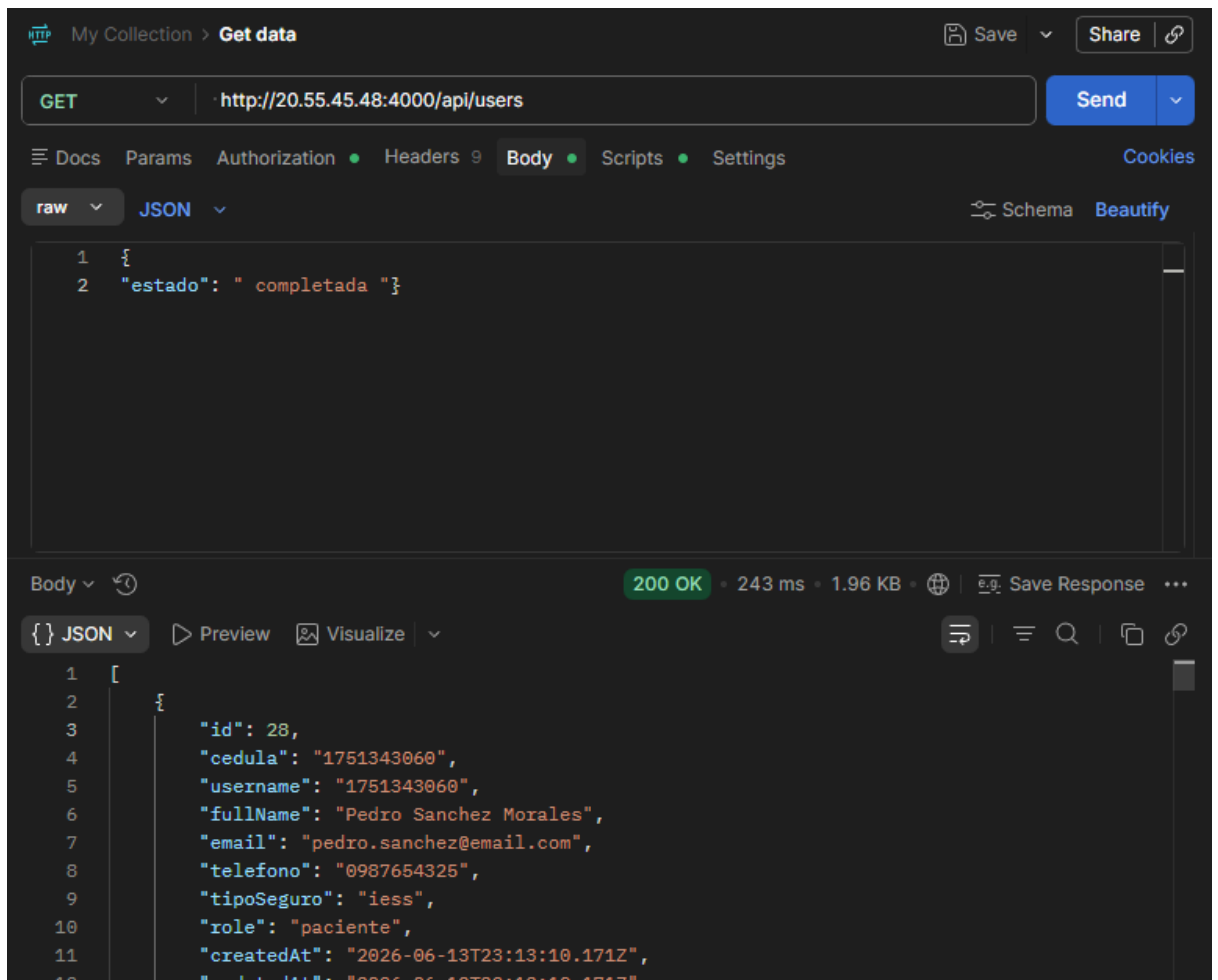

9 Appointments & Scheduling Module

URI 9.1 Get Available Time Slots works

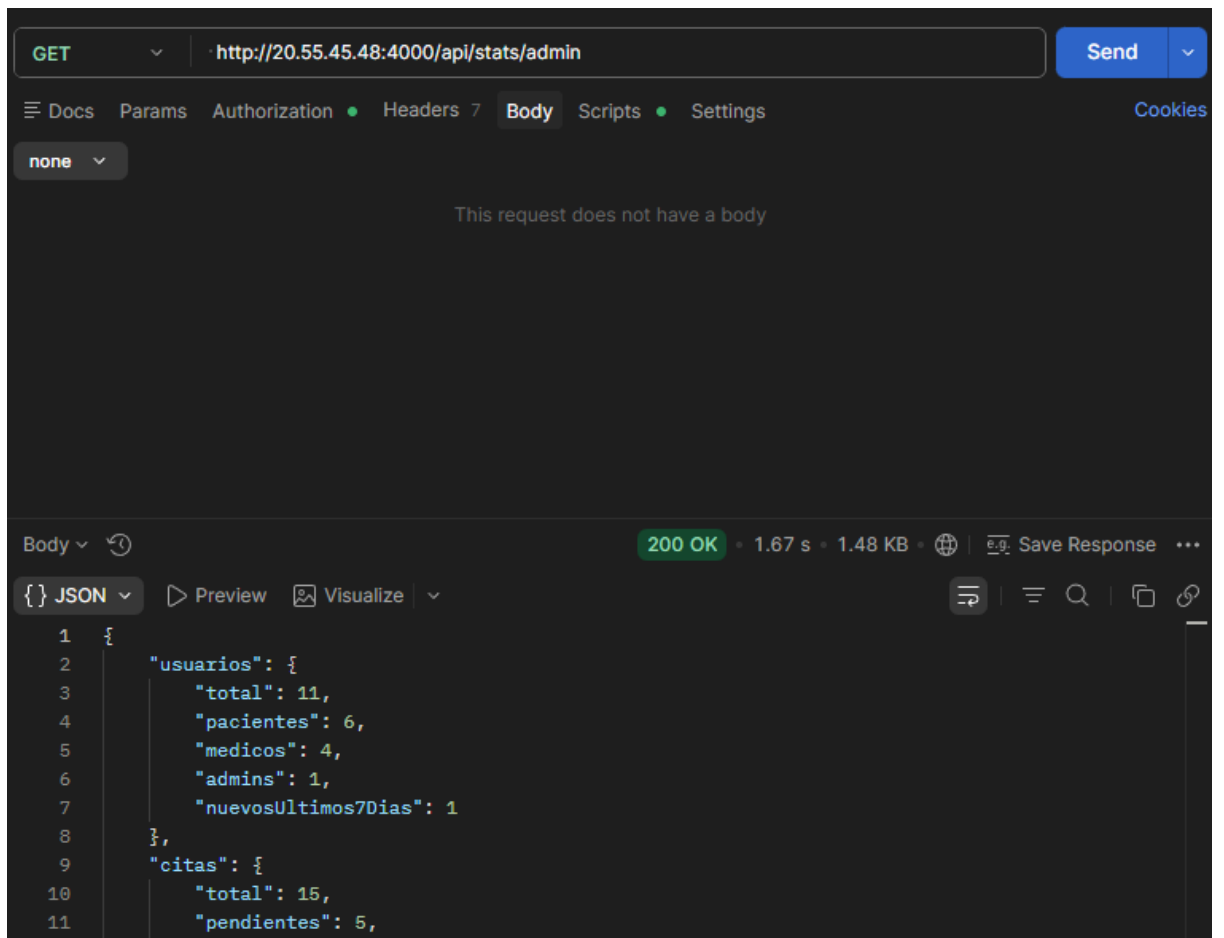

10 User Accounts Module

URI 10.1 Get All Users works

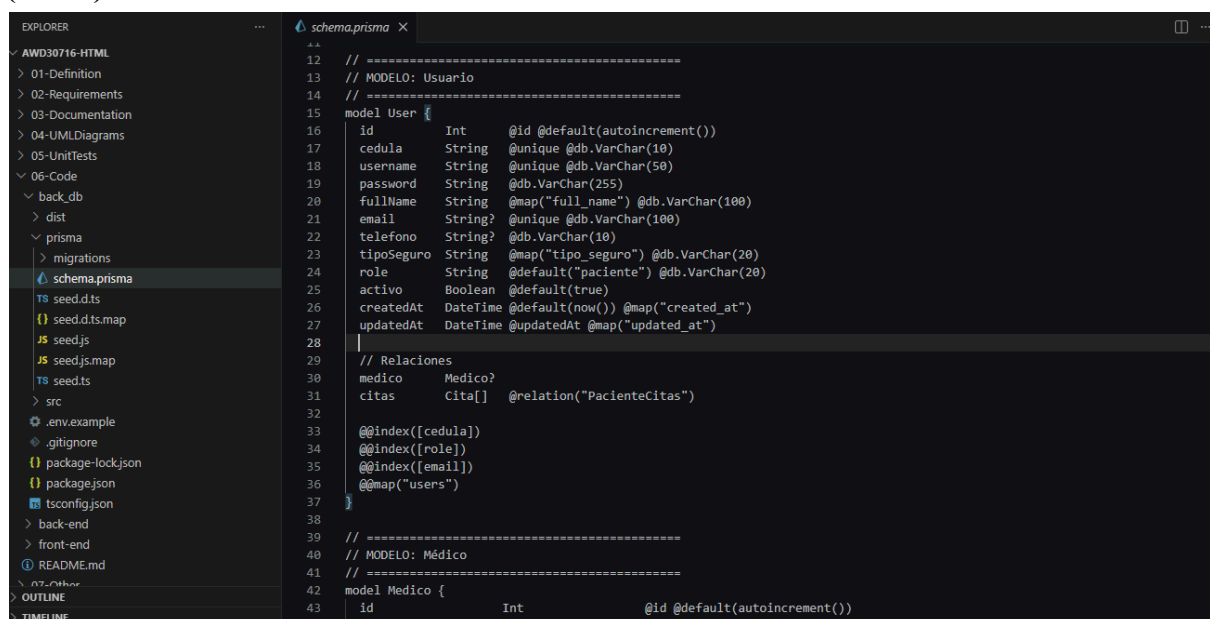

11 Reports & Statistics Module

URI 11.1 Obtain General Statistics works

(ORM) 10/10

Clean Code 20/30

-4 There are spanish comments in some files

```
// =====
// REGEX PARA IDENTIFICACIÓN DE FECHAS EN JSON
// =====
const ISO_DATE_REGEX = /^d{4}-d{2}-d{2}T\d{2}:\d{2}:\d{2}(\.\d+)?(Z|[-+]\d{2}:\d{2})?$/;
```

-3 There are function names in spanish, and also spanglish

```
if (!validarCedulaEcuatoriana(cedula)) {
  return res.status(400).json({ error: 'Cédula ecuatoriana inválida' });
}
```

-2 Files names are in spanglish

▼ controllers	
TS auth.controller.ts	9, M
TS citas.controller.ts	7
TS medicos.controller.ts	
TS stats.controller.ts	
TS terapias.controller.ts	

-1 Variable names in spanish

```
// Formatear respuesta
const citasFormateadas = citas.map(cita => ({
  id: cita.id,
  pacienteId: cita.pacienteId,
  medicoId: cita.medicoId,
```
