## Software Engineering Advanced Web Development Meeting Minutes

**Project:** Biconoir's Restaurant

**Team:** ByteClub

### 1. General Session Information

| Field         | Detail                                      |
|---------------|---------------------------------------------|
| Project       | Biconoir's restaurant                       |
| Date and Time | April 13, 2026 at 9:30 PM                   |
| Location      | Loja (Virtual Session)                      |
| Meeting Type  | Requirements Gathering and Scope Definition |

### 2. Participants

The client and the members of the technology team responsible for software development participated in the meeting:

- **Client:** Ángel Roldan, owner of Biconoir's restaurant.
- **Technology Team:**
  - Dylan Alvarado,
  - David Andino,

- Jilmar Calderon.

### 3. Meeting Objectives

1. Validate the overall product vision and its visual identity.
2. Define the system's critical functionalities.
3. Establish the project scope boundaries based on business priorities.

### 4. Topics Discussed and Agreements

#### 4.1 Functional Scope Definition

Following a review of the preliminary user stories, the need to optimize the technology team's resources was discussed. As a result:

- **Module Exclusion:** It was unanimously agreed to remove ingredient cost tracking from the current scope. The client considers it, while useful, not a critical functionality for the implementation of the ordering system.
- **Main Focus:** Development will focus on the customer experience for digital ordering and efficient, real-time kitchen management.

#### 4.2 Visual Identity and Brand

The official logo was presented under the "Biconoir's Gourmet" brand. The client approved the design with high contrast to improve legibility on mobile devices.

### 5. Corrections

| Action / Task                                                                             | Responsible Party | Deadline   |
|-------------------------------------------------------------------------------------------|-------------------|------------|
| Remove the word "gourmet" from the title on the homepage and replace it with "restaurant" | Technology Team   | 05/05/2026 |
| The page must be in Spanish                                                               | Technology Team   | 07/05/2026 |

| Action / Task                                                                                        | Responsible Party | Deadline   |
|------------------------------------------------------------------------------------------------------|-------------------|------------|
| The menu section should be presented as cards with a name, image, price, and description of the dish | Technology Team   | 12/05/2026 |
| The logo should be green, as should the page color                                                   | Technology Team   | 14/05/2026 |
| Enable the ability to remove ingredients from dishes upon selection                                  | Technology Team   | 18/05/2026 |

I hereby submit the corrections that need to be made to the prototype of my restaurant's website.

**Client Signature:**

 A handwritten signature in black ink, reading "Angelina", written diagonally across a light gray rectangular background.
