Accounting System – Test Cases Report

Product Backlog Decomposition into Features by Module

Introduction

This document serves as the report for the Quality Assurance (QA) tests performed on the accounting system. The tests verify the implementation of User Stories and Features defined in the project backlog.

Test Execution Summary

Feature FT-01: As a user, I want to register and log in to protect my information.

ID	Test Case	Expected Result	Status
CP-GP-01	Valid Login	Successful redirection to the Dashboard.	Functional

CP-GP-02	Invalid Login	Display error: "Incorrect credentials".	Functional
CP-GP-03	RUC with Letters	The system blocks the input or shows an error.	Functional
CP-GP-04	Empty Form Submission	Validation messages showing fields are required.	Functional
CP-GP-05	Valid Registration	Account created and user is redirected.	Functional
CP-GP-06	SQL Injection / XSS	System sanitizes input and treats it as plain text.	Functional
CP-GP-07	Negative RUC Numbers	System must reject the minus sign (-).	Non-Functional
CP-GP-08	Forced Route Access	Access denied for users without a session.	Functional

Feature: FT-02 (Workspace & Project Isolation)

ID	Test Case	Steps	Expected Result	Status
CP-GP-09	Create workspace	1. Enter valid RUC and fiscal year.	Isolated directory created correctly.	Pending
CP-GP-10	Duplicate workspace	1. Enter existing RUC and year.	Error: "Workspace already exists".	Pending
CP-GP-11	Data isolation	1. Upload file in RUC A. 2. Enter RUC B.	Data from RUC A is not visible in RUC B.	Pending
CP-GP-12	Forced path access	1. Force URL of another user's workspace.	Access Denied (403 Forbidden).	Pending
CP-GP-13	Invalid characters	1. Use special characters in RUC field.	System sanitizes and rejects input.	Pending
CP-GP-14	Delete workspace	1. Click delete and confirm.	Metadata and files are removed.	Pending

CP-GP-15	Workspace limit	1. Create more than allowed workspaces.	Message: "Limit reached".	Pending
CP-GP-16	List filtering	1. Search for a specific RUC.	Only matching workspaces are shown.	Pending

Feature: FT-03 (SRI Service Handshake)

ID	Test Case	Steps	Expected Result	Status
CP-GP-17	Successful connection	1. Enter valid SRI credentials. 2. Click Connect.	Connection status changes to "Connected to SRI".	Pending
CP-GP-18	Invalid SRI credentials	1. Enter an incorrect SRI password.	The SRI portal rejects access; the app displays an error message.	Pending

CP-GP-19	Connection Timeout	1. Simulate an extremely slow connection to the SRI.	Shows message: "Request timed out, please try again".	Pending
CP-GP-20	Local Network Failure	1. Disconnect the internet during the handshake process.	The system captures the exception and alerts the user.	Pending
CP-GP-21	SRI Service Down (500)	1. Simulate the SRI portal being down for maintenance.	Shows message: "SRI service temporarily unavailable".	Pending
CP-GP-22	Token Renewal	1. Wait for the SRI session to expire and reload the page.	System asks to reconnect or renews the session automatically.	Pending
CP-GP-23	Concurrent Connections	1. Open two tabs and try to connect at the same time.	The system manages only one active SRI session.	Pending
CP-GP-24	Certificate Validation	1. Connect while intercepting SSL using a proxy.	Connection fails due to security protocols (Man-in-the-middle protection).	Pending

Feature: FT-04 (Automated Invoice Retrieval)

ID	Test Case	Steps	Expected Result	Status
CP-GP-25	Successful XML Download	1. Click on "Sync Invoices".	All vouchers for the selected month are downloaded successfully.	Pending
CP-GP-26	Month with No Invoices	1. Synchronize a month with no activity.	Notification: "No invoices found in this period".	Pending
CP-GP-27	SRI Batch Limit	1. Download a month with more than 5,000 invoices.	The system uses pagination to prevent crashes or timeouts.	Pending
CP-GP-28	Partial Failure (Retry)	1. Interruption during download and click "Retry".	Resumes from the missing file instead of starting over.	Pending
CP-GP-29	Corrupt PDF File	1. SRI returns a corrupted PDF.	Valid XML is downloaded and the PDF is marked as unavailable.	Pending

CP-GP-30	Cancel Download	1. Start synchronization and click "Cancel".	The background process stops cleanly.	Pending
CP-GP-31	Sync Button Spam	1. Rapidly click the "Sync" button.	The button is disabled while the process is running.	Pending
CP-GP-32	Hash Verification	1. Validate file size after download.	The XML is not truncated and is not 0 bytes.	Pending

Feature: FT-05 (Fiscal Data Timeline Filtering)

ID	Test Case	Steps	Expected Result	Status
CP-GP-33	Specific Month Filter	1. Select "May" in the filter.	The table displays only invoices belonging to May.	Pending
CP-GP-34	Semiannual Filter	1. Select "Semester 1".	Data from January to June is displayed.	Pending

CP-G P-35	Custom Range	1. Set Start: May 15 / End: May 20.	Filters strictly between those specific days.	Pending
CP-G P-36	Inverted Date Range	1. Set Start: May 30 / End: May 01.	UI prevents selection or shows an error message.	Pending
CP-G P-37	Leap Year Handling	1. Filter by February 29th.	The calendar and filter process the date correctly.	Pending
CP-G P-38	Dynamic Update	1. Change filter without clicking "Search".	The table updates reactively.	Pending
CP-G P-39	Future Date Filter	1. Attempt to filter for the next month.	Displays empty results or field is disabled if no data exists.	Pending
CP-G P-40	Clear Filters	1. Click on the "Clear" button.	Resets to show the full default period.	Pending

Feature: FT-06 (Local Import & Ownership Integrity)

ID	Test Case	Steps	Expected Result	Status
CP-GP-41	Import valid XML	1. Upload a local invoice XML file.	The invoice is successfully added to the system and displayed in the table.	Functional
CP-GP-42	Drag & Drop Upload	1. Drag and drop 50 XML files into the upload area.	All files are processed asynchronously with a visible loading indicator.	Functional
CP-GP-43	RUC Mismatch	1. Upload an invoice from RUC X into a workspace dedicated to RUC Y.	Rejected with message: "The invoice does not belong to this RUC".	Functional
CP-GP-44	Non-XML Format	1. Attempt to upload an image or an executable (.exe) file.	Rejected due to MIME type validation.	Static UI (Pending)
CP-GP-45	Duplicate Invoice	1. Upload an XML file that already exists in the system.	Displays: "Voucher already imported" and ignores the duplicate file.	Static UI (Pending)

CP-GP-46	Malformed XML	1. Upload an .xml file with deleted or broken tags.	System captures the XML parsing error and notifies the user.	Functional
CP-GP-47	Size Limit	1. Attempt to upload a very large file (> 10MB).	The UI blocks the upload because it exceeds the size limit.	Static UI (Pending)
CP-GP-48	Mid-upload Failure	1. Refresh the page while files are currently uploading.	Files already uploaded persist in the system; those in progress do not.	Static UI (Pending)

Feature: FT-07 (ATS XLSM Generation Engine)

ID	Test Case	Steps	Expected Result	Status
CP-GP-49	Base Generation	1. Click on "Generate XLSM Draft".	Creates an .xlsm file containing all correctly loaded data.	Pending

CP-GP-50	Empty Generation	1. Attempt to generate the file without any invoices loaded.	The button is disabled or an alert shows: "No data available".	Pending
CP-GP-51	Decimal Mapping	1. Generate report using invoices with 4 decimal places.	The XLSM rounds or truncates values according to SRI standards.	Pending
CP-GP-52	Null Fields	1. Use invoices missing certain optional data.	Mapping leaves the cell empty or uses the SRI default value.	Pending
CP-GP-53	Macro Concurrency	1. Multiple users generate reports simultaneously.	The engine supports queues without crossing or corrupting files.	Pending
CP-GP-54	File Naming	1. Verify the name of the downloaded file.	Correct format (e.g., <code>ATS_0991234567001_052026.xlsm</code>).	Pending
CP-GP-55	Summation Totals	1. Review the totals row within the XLSM.	Excel formulas are applied correctly to the spreadsheet.	Pending

CP-GP-56	Excel Row Limit	1. Generate a report with more than 1 million invoices.	System splits the data or alerts regarding the Excel sheet limit.	Pending
-----------------	-----------------	---	---	---------

Feature: FT-08 (XLSM Structural Diagnostics)

ID	Test Case	Steps	Expected Result	Status
CP-GP-57	Clean Diagnostic	1. Scan an XLSM file that has no errors.	Displays message: "Valid structure, ready for XML".	Pending
CP-GP-58	Broken Summation	1. Manually change a total formula in the XLSM and upload it.	Detects that the subtotal + VAT does not match the Total.	Pending
CP-GP-59	Invalid ID (CI)	1. Enter a client ID (CI) with only 9 digits.	Throws an error indicating the exact cell and the reason.	Pending

CP-GP-60	Invalid Date Format	1. Enter a date in the wrong format (e.g., 2026/05/13 instead of dd/mm).	Throws a date format error.	Pending
CP-GP-61	Obsolete Retention Code	1. Enter a retention code that is no longer valid.	Diagnostic cross-references with the current SRI catalog and fails.	Pending
CP-GP-62	Export Error Log	1. Click on "Download Error Report".	Generates a .txt or .pdf file with the list of rows and error reasons.	Pending
CP-GP-63	Massive Validation	1. Upload an XLSM with multiple errors across multiple sheets.	Returns all detected errors in a single pass.	Pending
CP-GP-64	Re-validation	1. Correct an error and scan the file again.	The specific error disappears from the diagnostic results.	Pending

Feature: FT-09 (Official XML Encoding DIMM SRI)

ID	Test Case	Steps	Expected Result	Status
CP-GP-65	Valid Conversion	1. Click on "Generate Official XML".	A structured .xml file is successfully created.	Pending
CP-GP-66	Premature Conversion	1. Attempt to convert an XLSM that failed diagnostics.	The button is blocked, indicating that errors must be fixed first.	Pending
CP-GP-67	Character Encoding	1. Use names with special characters like 'Ñ' or accents.	The final XML is in valid UTF-8 format without encoding issues.	Pending
CP-GP-68	XSD Schema Match	1. Pass the generated XML through the official SRI XSD validator.	Perfect schema match with no structural errors.	Pending
CP-GP-69	Final File Size	1. Check the size of the generated file.	The XML is correctly minified for easy submission.	Pending
CP-GP-70	Secure Generation	1. Attempt to intercept the network during the download click.	Only the session owner is authorized to download the file.	Pending

CP-GP-71	DIMM Metadata	1. Review the <code><IdInformante></code> tag in the XML.	It strictly corresponds to the RUC of the current workspace.	Pending
CP-GP-72	Integrity (Hash)	1. Download the same report twice.	The resulting files are identical at the byte level.	Pending
